

# [Let kids be kids linky 15/4/14](#)

Welcome to let kids be kids linky.

This is a linky all about letting kids be kids, getting back to basics and having great childhood fun. We live in such a fast paced modern world with so much technology and stresses round every corner, we often need to be reminded to just 'play' and have fun, it's healthy for us all (yes, that includes you parents!).

Please join me in spreading the word, for encouraging children to step away from the technology for a while and go out, run around, use their imaginations and just have general basic FUN!

I hope you are all having a lovely easter break with your children. We had lots of fun last week in the New Forest. We visited a wildlife park, went on a forest walk and even spent a day on the beach! All of these posts to follow soon. We also enjoyed a lovely [worms in mud pudding](#) after a day in the garden. What have you been up to?

Thank you very much to all those who linked up last week. [Ghostwriter mummy](#) shared their easter themed treasure tray fun, [Loving life with little ones](#) showed us how to have fun washing the cars and [Make me an earth mother](#) shared a funny collection of food mash-ups.

There's not many rules, just link up your posts, old or new, about genuine childhood fun (of any age). It may be fun outdoors, jumping in puddles, nature hunts, riding bikes or making mud pies. Or it may be fun indoors with arts and crafts, making dens, cooking, messy play or reading. Or how about visiting a farm or fun at a fete. Or a discussion about kids growing up too fast, etc.

Whatever basic fun you have been having or discussing, link up and share your ideas, visit others to get inspiration and comment to give each other encouragement and support, but most importantly, HAVE FUN!

This linky will open every Tuesday for 6 days, so there's plenty of time to add your posts.

Please spread the word and grab my badge from my sidebar if possible.

If you tweet me your link (@karenattwinlife), I will happily retweet.
